

EQUITIES • FUTURES • OPTIONS FOREX • SWAPS • NDFs

Prime brokers allow their clients to trade with multiple brokers, market makers and banks using a single margin account.

Tradeview Prime allows your business to access deep, competitively priced, top-tier liquidity with significantly lower margin requirements. Unlike traditional prime brokers, we are able to offer a complete FX service, tailored specifically to your needs.

Advanced trade processing technology delivers fully integrated, accurate and secure trade processing.

- ☆ **Diverse Liquidity:** Rates sourced from clients, banks and non-bank liquidity providers
- ☆ **Anonymous Execution:** Your trades are executed with FX and your credit counterparty is our Prime Broker
- ☆ **No Fees:** No per trade, monthly or installation fees
- ☆ **Flexible and Advanced Technology:** FX partners, award winning technology providers

WE ARE PRIME

Prime brokers allow their clients to trade with multiple brokers, market makers and banks using a single margin account.

ORDER MANAGEMENT

Client may specify order execution approach, or leave it to our professional judgment.

EFP SERVICES

As demand for EFP transaction increases, so has our efforts to provide the EFP service our clients expect.

TRADING

Tradeview electronic trading solutions are tailored to ensure professional trading and execution of all products.

PORTFOLIO MARGIN

Using our real-time margin system, customers are able to increase their leverage. Calculations are done in real time for U.S. stocks, OCC stock and index options and U.S. single stock futures positions throughout the day based on the real-time price of the equity positions in the Portfolio Margin account.

LD4 LONDON SLOUGH DATA CENTER SPECIFICATIONS

This is one of many state of the art IBX centers in key metropolitan areas throughout EMEA that offer a full range of premium colocation.

BACK OFFICE

With Tradeview's solutions, transparency is increased while operational and liquidity risk is significantly reduced. Our Back Office system is designed to accommodate effective management, including customized online reporting, accounts analysis, system monitoring services and settlement processing (DVP/RVP, Margin, Pre-Trade and Post-Trade Credit Management).

DMA LOW LATENCY

Take advantage of our vast experience in the architecture, design and implementation of DMA and Latency driven solutions.
